The SkillsUSA Framework defines the mission of our organization.

For more than 50 years, SkillsUSA has been preparing the next generation of skilled workers with the technical, personal, and workplace skills defined by the SkillsUSA Framework developed for high school and college/postsecondary students enrolled in career and technical education (CTE) studying the skilled trades. This “learn by doing” approach of hands-on application that includes both technical and employability skill development, guided by a local instructor, has paid dividends for members. In Indiana, SkillsUSA Chapters are found in CTE classrooms in approximately 50 schools across our state. At our core, our membership of 3,200+ students and advisors improves the quality of our state’s future skilled workforce. Our year long program culminates at our State Championships held in the spring.

With SkillsUSA curriculum in our classrooms, we are committed to breaking the noise of competing messages that have long undermined careers in the trades.

We invite you to join forces with The Indiana Association of SkillsUSA, Inc. in a comprehensive partnership to support the growth and strength of the skilled trades.
